

PRODUCT SPECIFICATIONS

VERICOM® F-81 BARREL CONNECTOR

This F-81 female to female barrel connector is designed for VHF/UHF frequencies. Internally, the time-proven center conductor spring-contact design provides dependable and repeatable connections.

White suspension plastic insulators on both ends indicate low frequency design and avoid accidental use in a high frequency environment.

AT-A-GLANCE

DESCRIPTION	F-81 Female to Female Barrel Connector
APPLICATION	Splices two RG-6 cables together
QUANTITY	Bag of 50
ITEM #	WBF81-03562

FEATURES & BENEFITS

- Resilient internal metals for dependable repeated insertion connections
- Can easily be used in wall plates with your addition of a thin capture nut
- Bandwidth: 0 - 1,000 MHz
- Impedance: 75 Ohms
- Minimal insertion loss
