

Rack Mount LGX Fiber Patch Panel

Description / Specifications

Vericom's Rack Mount LGX fiber patch panel is available in 1RU. The panel provides an easy, convenient way to create a patch field for active electronics, like servers, protected in cabinets or other secure locations. Rack Mount panels fit in standard 19" racks and cabinets with an internal frame designed to accept standard LGX fiber adapter panels. Access to fiber connections is available from the front or back and fiber cables are organized and supported with a rear cable manager.

Features & Benefits

- Interoperable with all Standard LGX Fiber Adapter Panels
- Support bar provided to ensure long term reliability
- Flexible, cost effective design accepts a wide variety of connector options
- Durable frame, powder-coated to last the life of the network
- Support bars allow the use of hook & loop cable ties or loose nylon ties

Standards Compliance

- ANSI/TIA-568-C.3
- TIA-604-10 (FOCIS-10)
- TIA-604-3 (FOCIS-3)
- ISO/IEC 11801
- IEC 61754
- RoHS Compliant

Applications

The Rack Mount LGX fiber patch panel shall support, organize, manage and protect fiber optic connectors and patch cords. The LGX fiber patch panel is designed to be compatible with all standard LGX fiber adapters and cassettes from all standards-based manufacturers. The fiber patch panel is typically placed in the entrance, telecommunications room, or the main equipment room. The panel can manage up to 72 fibers in 3 LGX positions for 1 RU.
