

Rail Brush Kit

Description

The Rail Brush Kit improves cooling efficiency by preventing bypass airflow and hot air recirculation around the sides and top of the equipment mounting space.

Important Note: The Rail Brush Kit is designed exclusively for new 24" wide Vericom VC5 cabinets. Installation is required before mounting any equipment.

- Four panels mount to equipment mounting rails and extend to the cabinet side panels, while a separate panel mounts to the cabinet frame to seal off the space above the top rack unit
- Creates a flexible seal with cabinet sides and top, while still allowing cables to pass through
- Compatible with 24" wide VC5 cabinets
- Available in 42U and 48U heights

Product Specifications

Product Type: Rail Brush Kit

Base Material: Steel

Rack Unit Quantity: See Chart Below

Mounting Hardware: Included

Compatibility: 24" Wide VC5 Cabinets

Quantity Per Package: 1 (Sold Individually)

Item #	Rack Units
